SUMMARY

Final-year B.Tech Computer Science student with strong foundations in software engineering, object-oriented programming, and data structures & algorithms. Hands-on experience in designing, developing, and testing backend systems using Java, Spring Boot, RESTful APIs, and MySQL. Proven ability to solve complex problems, learn new technologies quickly, and build scalable, reliable, and secure software solutions in collaborative team environments. Targeting Software Engineering Intern roles.

TECHNICAL SKILLS

- Programming Languages:** Java, SQL, JavaScript
- Core Computer Science Concepts:** Data Structures and Algorithms, Object-Oriented Programming (OOP), Exception Handling, Collections, Problem Solving
- Backend & Databases:** Spring Boot, RESTful APIs, JDBC, MySQL (CRUD operations, joins, normalization, constraints)
- Security & Authentication:** JWT-based Authentication, Role-Based Authorization (Spring Security)
- Tools & Platforms:** Git, GitHub, IntelliJ IDEA, Eclipse, Visual Studio Code

PROFESSIONAL EXPERIENCE

Java Programming Virtual Intern – CODTECH IT SOLUTIONS

Mar 2025 – May 2025

- Developed backend components following the Software Development Lifecycle (SDLC)
- Implemented database-driven features using Java, JDBC, and MySQL
- Debugged and tested application functionality to improve correctness and reliability
- Collaborated in a structured development environment, applying problem-solving and time management skills

PROJECTS

1. Job Portal Backend System Java | Spring Boot | REST APIs | MySQL | JPA | JWT

- Designed and developed a scalable backend system supporting multi-role users (Admin, Recruiter, Candidate) for job posting and application workflows
- Built RESTful APIs using Spring Boot and JPA to manage users, jobs, and applications following clean architecture principles
- Implemented JWT-based authentication and role-based authorization using Spring Security to ensure secure access control
- Designed relational database schema with constraints to maintain data integrity and prevent duplicate job applications
- Improved system performance and reliability using pagination, request validation, and global exception handling
- Applied software engineering best practices including modular design, reusable components, and structured error handling

2. Expense Tracker Application Java | JDBC | MySQL

- Designed and developed a Java-based application to manage and persist user financial data
- Implemented secure and efficient database interactions using JDBC and MySQL
- Applied validation logic and exception handling to ensure data consistency and reliability
- Structured application logic using object-oriented principles to improve maintainability and extensibility

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering

CGPA: **7.85** | 2022 - 2026

Guru Nanak Institute of Technology, Hyderabad

Intermediate (MPC) | SR Junior College, Karimnagar

CGPA: **8.40** | 2020 - 2022

SSC | Vivekavardhini High School, Raikal

CGPA: **10.0** | 2019 - 2020

CERTIFICATES

- Java Programming Virtual Internship – **CODTECH IT SOLUTIONS** Mar 2025 – May 2025
- Java + Data Structures and Algorithms (DSA) Course – **Apna College** Jun 2024 – Feb 2025
- Java Hackathon Quiz - **ColgStack** sep 2025
